Joe Milani  
325 Foxborough Blvd. Ste 100  
Foxborough, MA 02035  
508-887-6082

### Cost

\$4,553,538

### Size and Type of Construction

Athletic complex renovations

### Types of Space

The Town of Framingham selected Seaver Construction to rebuild the Town's Athletic Complex. The original stadium was built as a WPA project in 1935 with a seating capacity of approximately 5,130 including the end zone grandstands reused in the early 1960s when the old Boston Braves Stadium was torn down.

The new work includes removal and replacement of the existing Bleachers with increased capacity, accessible Locker Rooms and Public Toilets, an Officials Room, Ticket Booth and Concession Stand and a state of the art Press Box. The site work includes new fencing, driveway and parking lot circulation improvements, streetscape design and improvements at Union Ave. Site lighting and security was upgraded. Landscaping was designed to enhance visual corridors and separate different site uses.

The track and playing field remained operational during construction.
