Wood Frame Construction
15,678 SF

Types of Space

Devens Transitional Housing is a new construction 16,000 sf wood frame building being designed to accommodate twelve single mothers and their children in a safe, healthy and natural environment as they learn the skills they need to become financially and socially independent. It also includes one staff apartment, offices, meeting room, and a central playroom. The building is entirely new construction, and is on track to become LEED for Homes certified at the gold level.
