104 Boston Post Road Suite 8
Weston, MA 02493
781-642-9685

Cost

\$611,728

Size and Type of Construction

Renovated 8,225 sf. one story frame church built in the 1960's, constructed a 2,110 sf. addition and installed the church's first steeple. Expanded office and meeting areas to open up more space for classrooms for a pre-school daycare center and after school programs for older children. A new wing was constructed to include an accessible entrance, lobby and reception area, offices, a library and a large general gathering space. A chapel was added adjacent to the sanctuary. Existing offices were converted to classrooms and existing classrooms were updated. The electrical, lighting and heating systems were updated and a state of the art fire detection system installed. Siding and roofing were replaced, the parking area was refurbished and an access ramp was installed at the front entrance. The Church remained operational during construction.
