### Project Type

Multi-Family Residential

---

### Project Summary

New construction of a 16,000 sq. ft. wood-frame building designed to accommodate twelve single mothers and their children in a safe, healthy and natural environment as they learn the skills they need to become financially and socially independent. The building has earned LEED for Homes certified at the gold level. Features include an energy recovery system, natural materials, water saving fixtures, high performance windows & doors and provisions for a future solar energy system.
