Salem, MA

Project Value

\$4,417,650

Project Type

Office

Project Summary

Construction of a 21,000 sq. ft. “Green” office building that will act as a swing space while the Historic Needham Town Hall is renovated. The PSAB will ultimately house other town departments such as DPW, Forestry, Planning, and other town services. The building materials are all high recycled content and low VOC materials. The site itself features 100% storm water reclamation which eliminates pollutant runoff into the water treatment facility and local water resources.
