Cost

\$ 538,504

Size and Type of Construction

A modern-style, 2,000 sf. addition to the front of a plumbing supply company. Designed to enhance the exterior appearance and image of the existing facility, the addition provides a new public entrance to the warehouse, and features a 2-story "recreation area" with built-in work stations, sculptural hanging light fixtures, clerestory windows, and a variety of ceiling shapes and paint colors.

A new conference room was added to the second floor which is accessed by an open stair and balcony that overlook the reception area. The conference room itself features full media technology presentations, a soaring sloped ceiling and a wall of view windows.

Also included in the addition is a new president's office and additional office and storage space for the facility.
